Vehicle fitment sheet must be completed when suspension fitted. Failure to do so may affect warranty. Fitment sheet can be found in all product boxes & on page 194 of this catalogue

WARRANTY

TERMS & CONDITIONS

Please note: All Warranty Claims are to be made to the place of original purchase

ACCOUNTS

Account Applications that are approved must comply with the following Term & Conditions

1. All export orders must be prepaid before shipment
2. Credit terms are 30 days from the end of the trading month
3. Credit will be suspended if payment is not made within the trading terms.
4. Unpaid accounts at 30 days are on stop supply.
5. If no credit arrangement exists, all goods must be prepaid before leaving 4Way Suspension premises.
6. If Applicant is a company, the Directors Guarantee must be completed by all relevant parties.

FREIGHT & INSURANCE

All Prices are quoted Ex-Warehouse and do not include freight. Goods pass to the buyer at the time they leave the 4Way Suspension Premises. Unless specified otherwise, freight will be added to the total cost of goods using the Supplier's preferred freight company.

CREDIT & WARRANTY RETURNS

Goods for credit or exchange must be returned within fourteen (14) days of invoice date accompanied by a completed **Returns Form**. Goods returned for the purpose of warranty claim must also be accompanied by the returns form along with a copy of the customer invoice. Freight for returned goods can be arranged by the returned or by 4Way Suspension, but in both cases, the associated costs remain the responsibility of the returner.

15% OF THE TOTAL VALUE OF THE RETURNED GOODS WILL BE CHARGED IN THE EVENT THAT REPACKAGING IS REQUIRED

WARRANTY EXCLUSIONS

1. Parts that have been incorrectly installed
2. Interference between shock absorber and other suspension components
3. Parts that have been involved in a motor vehicle accident or have been bent or have been physically damaged by impact of any kind.
4. Parts showing evidence of improper tightening of the mounting bolts causing parts to wear or bend
5. Gripping tool marks (vice grips or multi grips) or any other tool made mark on the polished chrome section of the shock absorber shaft
6. All parts subjected to abuse.
7. All parts used in Off-road or other racing events or activities
8. Any special order parts

Please Note: Any components built to a special order or specification outside the catalogue listings is not covered by warranty. This is because the manufacturer is unable to design components to withstand stresses in applications the R&D has not approved.

PROOF OF PURCHASE

A Copy of proof of purchase by the retail customer must be attached to the claim including the kilometre reading at the time of fitment (if applicable). Each 4WD Suspension fitted must have a fitting sheet completed and kept on file by either the vehicle owner or the fitment centre performing the work. Failure to produce the fitting sheet may affect the warranty of the product.

WARRANTY PERIODS

53mm Ralph (standard use)	3 Years/60,000km
53mm Ralph (IFS 100 Series)	2 Years/40,000km
53mm Ralph (Commercial Use)	1 Year/20,000km
45mm Adjustable (up to 2" Lift)	2 Years/40,000km
45mm Adjustable (above 2" lift)	1 Year/20,000km
45mm Adjustable (Commercial Use)	1 Year/20,000km
Foam/Gas/40mm Adj (standard use)	2 Year/40,000km
Foam/Gas/40mm Adj (above 2" lift)	1 Year/20,000km
41mm Foam Cell (IFS 100 Series)	1 Year/20,000km
RTC/EXT/SV Dampers	2 Year/40,000km
Leaf Springs	2 Year/40,000km
Coil Springs (up to 2")	3 year/60,000km
Coil Springs (above 2" Lift)	No Warranty

SELF FIT (DIY) SUSPENSIONS

DIY suspension fitment does not affect the warranty application or term as long as the following conditions are adhered to:

1. A fitting sheet is completed prior to the suspension being fitted and filed for later reference
2. The Above fitment sheet accurately and clearly includes bottom of rim to wheel arch measurements for all four corners of the vehicle both before, after and at the 500km check service.
3. U-Bolts must be replaced at the time of fitment. U-Bolts are a 'stretch fit' item, and should not be torqued to tightness twice. Re-using U-Bolts puts the vehicle and occupants at risk.

WARRANTY LIMITS

4way Suspension Products Pty Ltd's product warranty is limited to the repair or replacement of defective or faulty parts and does not include any costs incurred in labour for the removal or re-fitment of parts or damage incurred as a result of the product's fitment.

Freight should be added where required. When determining spring choice, include only permanent accessories & weights. Towing requirements are not included in constant load determination

Please Note:

1) The "Limited" comes standard with (Self Levelling) air shocks. These can be retained or removed as desired. If the (Self Levelling) air shocks are removed, the self levelling indicator light in the dash will turn on and off intermittently.

The air hoses should be sealed off and fastened to the chassis for later use if needed.

2) The air compressor must be turned off. The switch is located in the left hand rear inspection console. If further electrical work is required, please consult an Automotive Electrician.

Vehicle fitment sheet must be completed when suspension fitted. Failure to do so may affect warranty. Fitment sheet can be found in all product boxes & on page 194 of this catalogue

MINE SPEC APPLICATIONS PLEASE

NOTE:

Please always be aware of the GVM of the vehicle when selecting a suspension kit.

Kerb Weight - 1765-1815kg

GVM - 2810kg

Maximum Load - 995-1045 (model dependent)

Vehicle fitment sheet must be completed when suspension fitted. Failure to do so may affect warranty. Fitment sheet can be found in all product boxes & on page 194 of this catalogue

COMPLETE KIT PRICE REFERENCE

SHOCK CHOICE	SPRING CHOICE	RRP inc GST	CONTENTS
<p>41mm Foam Cell Struts Require Assembly</p> <p><u>Includes</u> 2 x Coil Springs 4 x Shocks 2 x Leaf Springs 2 x U-Bolt Kits 1 x Urethane Kit</p>	<p>T80LL CONSTANT 500KG</p>	<p>\$ 1745</p>	
<p>41mm Foam Cell Complete Assembly Struts</p> <p><u>Includes</u> 2 x Complete Struts 2 x Shocks 2 x Leaf Springs 2 x U-Bolt Kits 1 x Urethane Kit</p>	<p>T80LL CONSTANT 500KG</p>	<p>\$ 1885</p>	

When Selecting Mining Applications:

Carrying loads above the GVM in the tray of the vehicle will result in the following problems

- The Rear of the vehicle will drop down and the front ride height will increase.
- The struts will be riding at near full extension at all times
- When the vehicle is driven in this condition, the strut will top out (reach full extension) repeatedly.
- This leads to leakages and will eventually break the lower eye bush ring from the shock body.

With a 16" Rim fitted to the vehicle, the rim to guard ride height must not exceed **780mm as an Absolute Maximum**

Please Note:

Mining Spec Trays are often significantly heavier than traditional trays, and can weigh in excess of 500kg by themselves.

When fitted to the vehicle, the remaining carrying capacity (GVM minus Vehicle Weight) is 500kg.

When additional permanent loads are taken into account, there may be very little carrying capacity available in the vehicle.

Extra items to consider include:

1. Personnel
2. Tools & Tool Boxes
3. Vehicle Fuel
4. Front mounted accessories (Bar/Winch/Dual battery)
5. R.O.P.S

Please Call 4Way Suspension on (02) 9672 8899 for specialist assistance when selecting components for mining vehicle applications.

Freight should be added where required. When determining spring choice, include only permanent accessories & weights. Towing requirements are not included in constant load determination

Disclaimer

4Way Suspension Products Pty Ltd markets a range of off road products that may require certification from a qualified engineer prior to driving on public roads. The fitment of these items and the operation of the vehicle on public roads or road related areas prior to certification may render the vehicle unroadworthy, and may affect the status of your registration. Please check with the relevant ADR authorities in your state or territory and a qualified Engineer. Details of suitable Engineers are provided by the state/territory authority.

Vehicle fitment sheet must be completed when suspension fitted. Failure to do so may affect warranty. Fitment sheet can be found in all product boxes & on page 194 of this catalogue

VEHICLE WEIGHT

GVM & RELATED INFORMATION

GVM - WHAT IT MEANS TO YOU

The GVM, or Gross Vehicle Mass of any vehicle is the weight in Kg that the manufacturer has specified as being the maximum that the vehicle can weigh when fully loaded.

Exceeding the GVM (overloading the vehicle) can result in premature failure of a range of parts, including structural failure of the chassis.

ACCESSORIES & GVM

When Calculating how much load you are able to carry in your vehicle, remember to consider the weight of the accessories fitted. Accessories fitted add to the weight of the car, and reduces the allowable load that the vehicle can carry. These can include:

- Bullbar
- Winch
- Dual Batteries
- Underbody protection plates
- Sidesteps and scrub bars
- Long Range Fuel Tank(s)
- Draw Systems
- Rear bars
- Canopies
- Roof rack & accessories

After adding passengers, fuel, food and water, the vehicle must remain under the specified GVM from the manufacturer to avoid potentially dangerous & expensive vehicle damage and/or component failure. Consideration should be given towards the purchase of an offroad trailer.

Failure to observe the legal GVM of your vehicle is irresponsible and illegal. This may result in legal ramifications including fines and registration/licence cancellation as well as void insurance in the event of an accident. Vehicles operating above GVM are operating outside the tested and warrantable parameters of the suspension, and are therefore not covered by 4Way Suspension Product Warranty.

**SAFETY FIRST,
NEVER OVERLOAD
YOUR VEHICLE!**

Freight should be added where required. When determining spring choice, include only permanent accessories & weights. Towing requirements are not included in constant load determination
