

Outback Accessories is one of Australia's leading manufacturers and designers of 4x4 accessories and equipment.

Specialising in steel products, the company was established more than two decades ago, and quickly earned a reputation for producing rugged, reliable gear that was more than a match for the rigours of outback travel.

That tradition of building tough, durable products continues today with Outback Accessories marrying time-proven values with new levels of innovation, engineering sophistication, and style.

Operating from a dedicated Australian manufacturing facility, and employing a highly-skilled local workforce, Outback Accessories utilises the latest production techniques and precision CAD/CAM equipment to deliver the highest quality products...and the best possible value for money.

The range is constantly expanding, with new designs being developed to complement today's vehicles and give you better looking, better engineered, better performing products ...all with the strength and solidity of real steel.

And, of course, with all the strength and solidity of an Australian company whose products are *all* designed, manufactured, tested, and proven, right here in Australia.

**THE REAL DEAL
IN STEEL**

XROX FRONT BARS

Road legal, born from racing, XROX Front Bars deliver extreme off-road performance with serious good looks.

XROX REAR BARS

Get the strength of steel behind you with an XROX Rear Bar – real protection on or off the road.

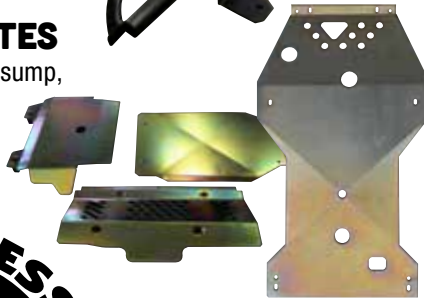

XROX SLIDERS

Save your sills and get proper rock-hopping security with a set of XROX Sliders.

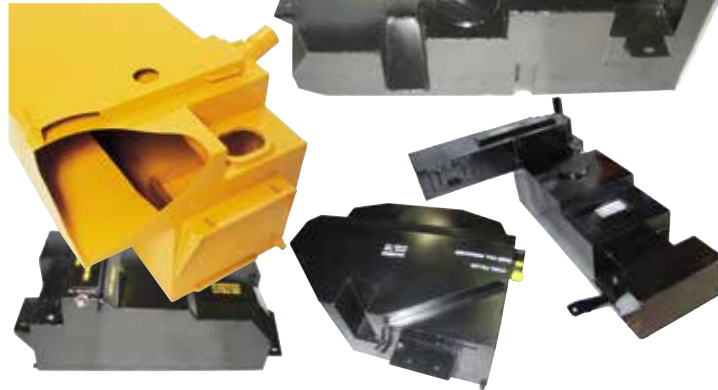

XROX BASH PLATES

Don't risk damage to your sump, back up your barwork with an XROX Bash Plate.

FUEL TANKS

Increase your vehicle's range with a precision-engineered underbody high-capacity fuel tank.

BATTERY TRAYS

Mount that auxiliary battery safely and securely.

WINCH CRADLE

Move your winch from front to rear.

CLASSIC BARWORK

Traditional steel bullbars and sidebars to suit older vehicles.

SINGLE CADDY

Get easier access to your spare and improve ground clearance with the Single Caddy – retains factory rear bumper assembly.

DOUBLE CADDY

Serious protection, versatility and convenience – replaces existing factory bumper.

HI-LIFT JACK HOLDER

Easy access right there on your spare wheel.

JERRY CAN HOLDER

Carry fuel or water more conveniently.

CAMP LIGHT MOUNT

Ajustable mount for your camp or work light.

AERIAL MOUNTS

Mount your CB and UHF aerials out of harms way.
